

Jesters Flat Accessibility Options

At Jesters Flat we endeavour to offer open access to our facilities and services.

Our horse rides vary in length and level of difficulty and we recommend the shorter rides for beginner riders. The trail rides are generally mostly suited to able riders, but we welcome riders with disabilities and make every attempt to offer the best possible service.

So, here's what you need to know!:

- We supply a large mounting platform to assist with easy mounting and dismounting. Guests are not required to mount the horse from the ground (on regular day rides)
- The terrain in the reception area is mostly uneven but some of our facilities can be accessed by wheelchairs. There is a ramp at the back of the clubhouse with parking nearby. We'll just need advance notice to direct guests to the appropriate area. There is no disabled toilet onsite.
- We don't have capacity, at this stage, for a Riding for the Disabled (RDA) level of activity but we can assist in various ways with other challenges such as hearing or vision impairment. Again, just let us know in advance so we can arrange the appropriate level of staffing and support.
- Guests not riding are able to enjoy the clubhouse and lawn/ play area. There is a little cubbyhouse and sand pit for young children as well as indoor games.
- The treehouse onsite is accessible for all with good mobility (the stairs are steep) however children need to be supervised by adult guardians at all times.
- Bushwalking on the property is always available for those not on horse back. The tracks are very sandy, unsealed and uneven so prams and wheelchairs etc will need to be all terrain style. For safety reasons, guests are unable to be on foot accompanying a group of riders on horse back.
- Finally, for the comfort and longevity of our horses, we have a weight limit of 95kgs.

We welcome your feedback so please let us know any particular accessibility requests. Please call us on 08 9757 4562 to discuss how we can create an enjoyable experience for all.
